

# Logger measurement range & cable length

- Select logger measurement range based on expected range of water levels:
  - 4m (13')
  - 9m (30')
  - 30m (100')
  - 76m (250')
- To calculate cable length:
  - Start with desired distance to sensor
  - Subtract 0.39m (or 1.3') for logger
- Note that cables can vary in length from what is ordered by +/-3%
- Stock cable lengths are 5m, 10m, 15m, 30m, 60m
  - custom cables will have a 2 to 4 week lead time initially.
